Creative with Leftovers - A Foodtalk (EN) - 12:15 - 13:15

The WERT!Stätte is a Basel based NGO, which is committed to reduce Foodwaste by re-using Food which can't or won't be sold anymore. Join us to find out how we combine foodwaste with social responsibility and a lot of creativity.

Presented by: Sonja Grässlin **Location:** Mehrzweckraum 035, Petersplatz 1

Bicycle Repair: Cedi's Velo Werkstatt (EN/DE) - 13:00 - 17:00

Cedi's Velo Werkstatt will fix your bike for free and help you get from A to B sustainably and safely!

Presented by: Cedi's Velowerkstatt **Location:** Main Entrance, Petersplatz 1

Film Screening: "Normal is over" (EN) - 18:15 - 20:00

Why is the way our economic and financial system is designed closely interlinked with the current sustainability crisis? Explore these and many more questions addressed in the film "Normal is over" and join us for a lively panel discussion afterwards.

Presented by: MSD comitee **Location:** Hörsaal 001, Petersplatz 1

Digitalisation and its Impact on the Environment (EN) - 12:15 - 13:15

Digitalisation has a strong impact on sustainable development. This holds for human behavior and societal development, but also the way we operate electronic devices and digital services. In particular, digitalisation requires substantial re-organization.

Presented by: Frank Krysiak **Location:** Hörsaal 116, Petersplatz 1

Wie repariere ich mein Smartphone (DE) - 14:15 - 15:15

Dein Handy macht nach kurzer Zeit schlapp, aber Du möchtest es nicht schon wieder ersetzen? Es ist zu Boden gefallen und das Displayglas zerbrochen? Du traust Dich nicht es selbst zu reparieren? Dieser Workshop zeigt Dir, wie es geht und was Du beachten solltest. Verlängere das Leben Deines Handys!

Leitung: Urs von der Rep-statt **Standort:** Hörsaal 120, Petersplatz 1

The Role of Sustainable Energy Today & Tomorrow (EN) - 18:15 - 19:30

What have we learned from the recent energy crisis? How do we achieve a sustainable energy transition? What challenges do we have to deal with when using renewable energies? These and more questions will be answered in the panel discussion. **Moderated by:** Thomas Häusler

Panelists: Roger Langenegger, Rebecca Lordan-Perret & Rudolf Rechsteiner **Location:** Hörsaal 1, Petersplatz 1

Autogenes Training (DE) - 12:15 - 13:15

Bist du nervös, gestresst, verspannt, energielos, ängstlich oder unsicher? Mit autogenem Training wirst du entspannter, ausgeglichener, leistungsfähiger, selbstsicher, erfolgreicher und zufriedener!

Leitung: Merita Borner-Farac **Location:** Mehrzweckraum 035, Petersplatz 1

Shareitt-Tauschnachmittag (DE/EN) - 14:00 - 18:00

At the Shareitt swap afternoon, you'll learn about the new collaborative app Shareitt. We'll swap clothes, "preloved" home accessories, books, games, and other necessities for student life. Bring two (or more) items, download the Shareitt app, and let us show how to keep beautiful stuff moving from person to person without harming or impacting the environment.

Led by: Tania Schellenberg from Shareitt **Location:** Main entrance, Petersplatz 1

Plant & Seed Swap (DE/EN) - 16:00 - 18:00

Exchange your plants and seedlings, but also seeds with GreenUp and the Samenbörse! Learn about fertilizing plants and much more.

Led by: Green-up & Samendatenbank **Location:** Foyer Aula, Peterplatz 1

Climate Change - What Future do We Want? (EN) - 18:15 - 19:15

Gian-Kasper Plattner summarizes the state of knowledge on observed changes in the global climate system, their causes and on scenarios of possible climate futures. He highlights the urgency of concrete measures to meet internationally agreed-on climate targets.

Presented by: Gian-Kasper Plattner **Location:** Hörsaal 117, Petersplatz 1

From The Limits to Growth to Earth4All: Systemic solutions to wicked problems (EN) - 12:15 - 13:15

In 1972, the Club of Rome commissioned a report - The Limits to Growth - to look at the interconnected issues and complex problems faced by humanity. 50 years later it is clear that we are overshooting the carrying capacity of our planet and can observe the consequences of our extractive economic system. In 2022 The Club of Rome published a new report, called "Earth4All". The book proposes five extraordinary turnarounds that provide a framework for a fair, just, and affordable economic transformation.

Presented by: Till Kellerhof **Location:** Hörsaal 116, Petersplatz 1

Fermentation-Workshop (DE/EN) - 17:00 - 19:00

In this fermentation workshop, we will make fermented vegetables, tempeh, and water kefir. Collect your empty glass jars and get ready to take home some tasty food and new skills!

Presented by: Xenia Ficht **Location:** D-BSSE, Mattenstrasse 26

My Crisis? Individual Behavior and Behavior Change in the Context of Global Climate Change (EN) - 18:15 - 19:30

In this lecture, we will discuss the psychological mechanisms underlying climate change perception and individual climate relevant behavior as well as evidence-based means to promote more sustainable behavior change.

Presented by: Prof. Ulf Hahnel **Location:** Hörsaal 115, Petersplatz 1

Swissveg-Workshop and Sustainable Lunch Cooking (DE/EN) - 10:00 - 13:00

Swissveg zeigt auf, weshalb eine pflanzliche Ernährung am nachhaltigsten ist und wie sie im Alltag einfach umgesetzt werden kann. Im Anschluss wird ein ausgewogenes, veganes Mittagessen gekocht.

Led by: Swissveg & Chantal Senn **Location:** Food Culture Lab, Freilager-Platz 1

Kompostier-Workshop (DE) - 14:15 - 15:15

Die Stadtgärtnerei des Kantons Basel-Stadt wird uns die Funktionsweise eines herkömmlichen Komposts aufzeigen und erklären, welche organischen Abfälle sich für das Kompostieren eignen.

Leitung: Edith Egli **Standort:** Pressezimmer 028, Petersplatz 1

Degustation of Vegan and Vegetarian Alternatives and Live Music (DE/EN) - 17:00 - 23:00

Dive into a whole new world of meat and dairy product alternatives by tasting food from various producers of sustainable vegan and vegetarian meals. Also join us for a concert of Yasmin Kugler from 17.30 to 18.30, who will welcome you to this wonderful gathering.

Location: Verso, Kollegienhaus, Peterplatz 1

The Way of Water - From the Rhine to Your Home (DE/EN). 10:00 - 12:00

In order to be able to sustainably meet the drinking water needs of the city of Basel, the natural groundwater is enriched with water from the Rhine. During a two-hour guided tour of the plant in the Lange Erlen, the unique biological purification process of the drinking water and the supplementary treatment stages are explained in an captivating way.

Led by: Alexandre Barth **Location:** Trinkwasseraufbereitung Basel

Biogas & Compost out of Organic Waste (DE/EN). 14:00 - 15:30

The fermentation of organic waste can produce valuable fertilizer and climate-neutral biogas. Both, the carbon cycle and the nutrient cycle, close with this type of biomass utilization. At the biomass fermentation plant in Pratteln, organic residues are recycled using a two-stage combined fermentation and composting process. The 90-minute guided tour deals with these processes and explains them in an interesting way.

Led by: Alexandre Barth **Location:** Biomassevergärungsanlage Pratteln

TODAY FROM 12.00 TO 13.30 SOME EXPERTS ARE PRESENT!

TUESDAY, 21. MARCH 2023

12:15 - 13:15 Uhr

Digitalisation and its Impact on the Environment (EN)

Digitalisation has a strong impact on sustainable development. This holds for the resources and the energy required to build and operate electronic devices and digital services. But it also holds for human behavior and societal development. In particular, digitalisation requires substantial re-organization to become useful for sustainable development and might end up being detrimental in this regard, if this re-organization is not achieved. The talk will explore these topics.

Presented by: Frank Krysiak

Location: Hörsaal 116, Kollegienhaus, Petersplatz 1

14:15 - 15:15 Uhr

Wie repariere ich mein Smartphone? (DE)

Dein Handy macht nach kurzer Zeit schlapp, aber Du möchtest es nicht schon wieder ersetzen? Es ist zu Boden gefallen und das Displayglas zerbrochen? Du traust Dich nicht, selbst zu reparieren? Dieser Workshop zeigt Dir, wie es geht und was Du beachten solltest. Verlängere das Leben Deines Handys!

Autogenes Training (DE)

Bist du nervös, gestresst verspannt, energielos, ängstlich oder unsicher? Mit autogenem Training wirst du entspannter, ausgeglichener, leistungsfähiger, selbstsicher, erfolgreicher und zufriedener! Der erste Schritt zu mehr Ruhe, Wohlbefinden, besserer Gesundheit und Leistungsfähigkeit.

Leitung: Merita Borner-Farac

Location: Mehrzweckraum 035, Kollegienhaus, Petersplatz 1

14:00 - 18:00 Uhr

Shareitt Tauschnachmittag - Shopping without Money (DE/EN)

At Shareitt Tauschnachmittag, you will learn about the new collaborative app Shareitt. We will swap clothes, home accessories, books, games, and other necessities for student life. Bring at least two items, download the app Shareitt, and let's show together how to keep beautiful things flowing without harming the environment. Sustainability needs a new culture of sharing that is fun because you get to know people and tell the stories of things instead of always producing new ones.

Led by: Tania Schellenberg

Location: Main entrance, Kollegienhaus, Petersplatz 1

Attention: The app requires an invitation code. When downloading, please enter the code "SW2023"*** after the 4-digit number (which is sent by SMS). And you're in and ready to go with 30 points. www.shareitt.ch // #weshareitt

16:00 - 18:00 Uhr

Plant & Seed Swap (DE/EN)

Swap your greens! Whether you are green thumbed or a plant killer: exchange your plants and seedlings, but also seeds with GreenUp and the Samenbörse! Learn about fertilizing plants and much more. Bring what you have and also exchange experiences and knowledge. There are many ways to bring more green into your life and the city!

Led by: Green-up & Samendatenbank

Location: Ground floor, Foyer Aula; Kollegienhaus, Peterplatz 1

18:15 - 19:15 Uhr

Climate Change - What Future do We Want? (EN)

Gian-Kasper Plattner, Senior Scientist at the Swiss Federal Research Institute WSL and IPCC Lead Author, offers insights into the work of the IPCC and an overview of the key assessment conclusions of the latest IPCC report on the physical science basis of climate change. He summarizes the state of knowledge on observed changes in the global climate system, their causes and on scenarios of possible climate futures. He highlights the urgency of concrete measures to meet internationally agreed-on climate targets.

Swissveg-Workshop (DE) and Sustainable Lunch Cooking (DE/EN)

Swissveg zeigt auf, weshalb eine pflanzliche Ernährung am nachhaltigsten ist und wie sie im Alltag einfach umgesetzt werden kann. Swissveg ist die grösste und älteste Interessenvertretung vegan und vegetarisch lebender Menschen in der Schweiz. Seit 1993 setzt sie sich durch positive Öffentlichkeitsarbeit dafür ein, den Konsum tierischer Produkte dauerhaft zu reduzieren und die Vorteile der veganen Lebensweise für die Tiere, Umwelt und Gesundheit in der Gesellschaft und Politik bekannter zu machen. Im Anschluss wird ein ausgewogenes, veganes Mittagessen gekocht.

Led by: Swissveg & Chantal Senn

Location: Food Culture Lab, Hochschule für Gestaltung und Kunst, Freilager-Platz 1
With **Online Sign Up until 22.03.2023** on ['Let's Meet'](#).

14:15 - 15:15 Uhr

Kompostier-Workshop (DE)

Kann man alle organischen Abfälle kompostieren? Die Stadtgärtnerei des Kantons Basel-Stadt wird uns die Funktionsweise eines herkömmlichen Komposts aufzeigen und erklären, welche organischen Abfälle sich für das Kompostieren eignen. Danach werden Kompostanlagen für Zuhause vorgestellt.

Leitung: Edith Egli

Standort: Pressezimmer028, Kollegienhaus, Petersplatz 1
Mit **Online Sign Up bis 21.03.2023** auf ['Let's Meet'](#).

17:00 - 23:00 Uhr

Degustation of Vegan and Vegetarian Alternatives and Live Music

Are you skeptical about the new vegan trend or do you already love meat alternatives? Dive into a whole new world of meat and dairy product alternatives by tasting food from various producers of sustainable vegan and vegetarian meals. Also, join us for a concert of Yasmin Kugler from 17.30 to 18.30, which will welcome you to this wonderful gathering.

SATURDAY, 25. MARCH 2023

10:00 - 12:00 Uhr

The Way of Water - From the Rhine to Your Home (DE/EN)

We almost take for granted to have fresh and qualitatively impeccable drinking water in sufficient quantities at all times. But what effort and infrastructure are behind it? In order to be able to sustainably meet the drinking water needs of the city of Basel, the natural groundwater is enriched with water from the Rhine. In the wooded watering places of the Lange Erlen, billions of soil organisms do most of the cleaning for us. The use of this natural cleaning process is unique in this way and proves to be very good.

During a two-hour guided tour of the plant in the Lange Erlen, the unique biological purification process of the drinking water and the supplementary treatment stages are explained in an exciting way.

Led by: Alexandre Barth

Location: Trinkwasseraufbereitung Basel, Finkenweg, 4058 Basel

Mit Online Sign Up **bis 25.03.2023** auf ['Let's Meet'](#).

14:00 - 15:30 Uhr

Biogas & Compost out of Organic Waste (DE/EN)

Large amounts of biowaste are generated in households, large kitchens and the food industry. What cannot be composted ends up in incineration. This is a complete waste because the fermentation of this material could produce valuable fertilizer and climate-neutral biogas. Both the carbon cycle and the nutrient cycle close with this type of biomass utilization.

At the biomass fermentation plant in Pratteln, organic residues are recycled using a two-stage combined fermentation and composting process.

The 90-minute guided tour deals with these processes and explains them in an interesting way.

Led by: Alexandre Barth

Location: Biomassevergärungsanlage Pratteln, Heissgländstrasse 12, 4133 Pratteln
